

The K-BIO NJ Summit 2025 is a collaborative initiative co-created by **Choose New Jersey**, **KCED** (Korea Culture & Economic Development LLC), and the **Hudson County Chamber of Commerce – Korean Chapter**.

Together, these organizations are building a cross-border bridge between Korea and the United States — fostering biotechnology exchange, investment, and institutional partnerships for a healthier global future.

KOREAN CHAPTER

Choose New Jersey is the State of New Jersey's leading nonprofit economic development organization, dedicated to attracting global businesses, fostering innovation, and promoting sustainable economic growth.

Through strategic partnerships across industries and governments, Choose New Jersey champions collaboration that drives opportunity — positioning New Jersey as a global hub for life sciences, technology, and international investment.

The Hudson County Chamber of Commerce – Korean Chapter serves as a vital bridge connecting Korea's fast-growing industries with the diverse economic landscape of New Jersey.

Through direct collaboration across government, non-governmental organizations, business, education, and culture, the Korean Chapter fosters meaningful partnerships that strengthen bilateral relations and expand opportunities for innovation, trade, and community development. With a mission to elevate the Korean-American business community and introduce Korea's industrial excellence to the global stage, the Chapter continues to lead as a model for cross-border collaboration and shared growth.

KORI Culture & Economic Development (KCED) is a cross-cultural platform that connects Korea's innovation and creativity with the U.S. market through media, business facilitation, and community partnerships.

Rooted in storytelling and strategy, KCED builds bridges between culture and commerce — amplifying the global presence of Korean industries while fostering meaningful economic and social impact.

**We are proud to introduce our participating companies
— visionary innovators shaping the future of biotechnology through
creativity, science, and collaboration.**

Together, they represent the shared spirit of K-BIO NJ Summit 2025: advancing global health, connecting communities, and redefining what's possible.

GenBody Inc. is a global leader in rapid diagnostic and in-vitro diagnostic (IVD) solutions, headquartered in South Korea with U.S. operations in California.

The company develops high-quality diagnostic technologies for infectious diseases, contributing to global health with innovation, reliability, and accessibility.

GenBody is dedicated to making diagnostics faster, smarter, and more accessible worldwide.

Stellar Cube Inc. is an AI-driven biotechnology company redefining the future of aging, wellness, and pain management through advanced medical technology and data standardization.

Guided by its mission **“to redefine aging, wellness, and pain management through AI-powered medical technology and data standardization,”** the company envisions building the world’s most intelligent health-data ecosystem — where pain, aging, and chronic conditions become measurable, preventable, and personalized.

The organizing team of the K-BIO NJ Summit 2025 extends its deepest gratitude to our institutional partners and collaborators whose vision and support made this international program possible.

Our sincere appreciation goes to Choose New Jersey, the Hudson County Chamber of Commerce – Korean Chapter, and KORl Culture & Economic Development (KCED) for their leadership in building a meaningful bridge between Korea and New Jersey's life-science ecosystem.

We also thank all participating companies, researchers, and community leaders who contributed to shaping this milestone event.

Together, we celebrate a shared mission — connecting innovation, culture, and opportunity beyond borders.

Special Thanks to

The March 2026 Private Biotech Matching Summit

Following the success of this first private program, KCED announced the 2nd Private Biotech Matching Summit, scheduled for March 2026.

The next edition will include a broader range of Korean biotech, AI-health, and digital healthcare companies, and introduce a formalized Biotech Matching Platform to facilitate sustained collaboration and investment.
